

# 30 percent solar battery storage installation

Are solar storage systems eligible for a 30 percent credit?

The exact same ITC that provides a 30 percent credit on the cost of your solar system provides that same benefit to storage systems under certain conditions. Due to the Inflation Reduction Act, as of 2023, all residential storage systems over 3 kilowatt-hours (kWh) in size are eligible for the ITC.

Can You claim a solar energy credit if you add battery storage?

Although the IRS and Department of Energy have yet to issue guidance on the matter, it appears homeowners will be able to claim the Residential Clean Energy Credit for adding battery storage added to existing solar systems.

What is the best incentive for solar storage?

The best incentive for storage is the federal investment tax credit (ITC). The exact same ITC that provides a 30 percent credit on the cost of your solar system provides that same benefit to storage systems under certain conditions.

Will a 3 kilowatt-hour battery qualify for a solar tax credit?

According to the bill, the 3 kilowatt-hour minimum battery capacity took effect in 2023. Considering the average battery installation is closer to 10kWh, most batteries will easily exceed the minimum amount to qualify for the solar tax credit. And notice that there are no maximum size, price, or tax credit qualifications.

How do I claim a battery storage credit?

Battery storage technology must have a capacity of at least 3 kilowatt hours. File Form 5695, Residential Energy Credits with your tax return to claim the credit. You must claim the credit for the tax year when the property is installed, not merely purchased.

How many kilowatts is a solar battery?

"(Have) a capacity of not less than 3 kilowatt hours." According to the bill, the 3 kilowatt-hour minimum battery capacity took effect in 2023. Considering the average battery installation is closer to 10kWh, most batteries will easily exceed the minimum amount to qualify for the solar tax credit.

The Residential Clean Energy Credit is a dollar-for-dollar tax credit worth 30% of the total cost of solar and/or battery storage expenditures. As a non-refundable tax credit, it lowers your tax liability on your federal tax return.
