

# 30 percent solar battery storage

Are solar storage systems eligible for a 30 percent credit?

The exact same ITC that provides a 30 percent credit on the cost of your solar system provides that same benefit to storage systems under certain conditions. Due to the Inflation Reduction Act, as of 2023, all residential storage systems over 3 kilowatt-hours (kWh) in size are eligible for the ITC.

Do solar battery storage systems qualify for tax credits?

Historically, there were only federal tax credits for solar battery storage. This meant that battery storage systems installed independently or added to existing solar systems did not qualify for these incentives.

What is the best incentive for solar storage?

The best incentive for storage is the federal investment tax credit (ITC). The exact same ITC that provides a 30 percent credit on the cost of your solar system provides that same benefit to storage systems under certain conditions.

Can You claim a solar energy credit if you add battery storage?

Although the IRS and Department of Energy have yet to issue guidance on the matter, it appears homeowners will be able to claim the Residential Clean Energy Credit for adding battery storage added to existing solar systems.

What are battery storage system tax credits?

Among the many provisions of the IRA, the introduction of battery storage system tax credits stands out as a major incentive for individuals and businesses looking to invest in energy storage solutions. These battery storage system tax credits aim to accelerate the adoption of energy storage technologies.

Will a 3 kilowatt-hour battery qualify for a solar tax credit?

According to the bill, the 3 kilowatt-hour minimum battery capacity took effect in 2023. Considering the average battery installation is closer to 10kWh, most batteries will easily exceed the minimum amount to qualify for the solar tax credit. And notice that there are no maximum size, price, or tax credit qualifications.
