

Aegis solo battery life

Does the Aegis Solo 3 have a battery?

The Aegis Solo 3 comes with a built-in 3000mAh battery and supports a single external 18650 battery. Battery life is crucial when you're adventuring, and the Aegis Solo 3 doesn't disappoint. This flexibility means you never have to worry about running out of power, even on multi-day trips.

How does the geekvape aegis solo 100W battery life affect it?

Furthermore, discharge is another thing that can affect the battery's life. To prevent overcharging and discharging, the GeekVape Aegis Solo 100w has a battery protection circuit that prevents over or discharging. Suppose the vape mod overheats you cannot continue vaping, and this can make you feel stressed.

Is aegis solo 3 the same as Legend 3?

If you put both devices side by side, it's easy to see that the Aegis Solo 3 is just a smaller, single battery (or built-in battery) version of the Legend 3. Like its predecessor, the Aegis S100 (Solo 2), there's not much rubber on the exterior of the device. The body is made up of a metal frame with a leather grip on the back.

What happens if you overcharge the geekvape aegis solo 100W?

When it overcharges, it will spoil the battery and can burn the mod. Furthermore, discharge is another thing that can affect the battery's life. To prevent overcharging and discharging, the GeekVape Aegis Solo 100w has a battery protection circuit that prevents over or discharging.
