

Aegis solo battery replacement

How do I charge my aegis solo?

The Aegis Solo is powered by (1) high amp 18650 battery (sold separately) and may be charged via the micro USB charging port which may be sealed tight with the silicone plug. The Geekvape Cerberus Sub-Ohm Tank features new Aero Mesh atomizer heads designed to produce incredible amounts of flavor and vapor.

What is the Aegis Solo?

The Aegis Solo is a compact version of the popular Aegis system. It features a compact size, making it perfect for vaping on the go. The device has a lightweight and smooth chassis constructed with SLI silicone. It is powered by a single 18650 battery (not included).

What wattage battery should I use in my aegis?

Hi Rammstein, if you look at Baditude's post above, showing the batteries and wattages, and you are vaping up to 75 watts using any of the following will work fine for you in your Aegis. They are all highly recommended batteries by Mooch, who is the battery expert, so they are all very good batteries.

What battery types can the Aegis use?

The Aegis can use both 26650 and 18650 cells. If you purchase the Aegis with the Golisi 26650 included, you're not even restricted to one battery type, since you can switch it out for an 18650 cell.

What is a geek vape aegis solo 100W starter kit?

Discover the Geek Vape AEGIS SOLO 100W Starter Kit, continuing the legacy of the AEGIS series with a long-awaited single 18650 platform with 100W of maximum output while maintaining top-level durability to pair with the CERBERUS Sub-Ohm Tank. Batteries are sold separately. Once the colors are made out-of-stock, it is no longer available.

How many watts can a aegis legend vape?

Since the Aegis Legend is a dual battery mod, you get double the wattage over a single battery mod. So for example Sony VTC6 cells are rated as 15 amp batteries. Each one provides up to 45 watts, so using two gives you up to 90 watts. If you will vape more than 90 watts, choose higher amp batteries.
