

# Analysis of the current situation of energy storage industry in poland

Is Poland a key player in Europe's energy storage sector?

Poland is emerging as a significant player in Europe's energy storage sector. The recent capacity market auctions in December 2024 highlighted a substantial shift towards BESS, with approximately 2.5 GW secured by new generation capacity market units, predominantly Li-ion energy storage projects.

Is energy storage a good investment in Poland?

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects.

What happened to energy storage in Poland?

The Energy Regulatory Office said in a report last year on electricity storage in Poland that, as a result of the main power market auctions for 2021-2028 and the supplementary auctions for 2012-2025, contracts for energy storage with a total capacity of 9.5 GW were concluded.

What are the new energy storage rules in Poland?

Poland's new rules state that energy storage facilities over 10MW require licensing to ensure they can provide services to Poland's National Power System. Facilities 10MW or smaller do not need licensing but do need to register with the transmission system operator or distribution system operator for their area.

Should US companies offer battery energy storage systems in Poland?

U.S. Commercial Service recommends that U.S. companies offering battery energy storage systems take a hard look at the Polish market because there will be opportunities for U.S. companies to propose their solutions for many years to come. For more information, please contact Commercial Service Poland at [office.warsaw@trade.gov](mailto:office.warsaw@trade.gov).

What is the current percentage of Poland's gas storage facilities?

Poland's gas storage facilities are 81% full, gas company PGNiG said on Wednesday, an increase on the previous week after Russia cut off supplies.

Poland's energy storage market is growing fast. Discover key insights from Enex 2025 on BESS adoption, investment trends, and grid challenges.

This analysis looks at Poland's progress on electricity transition in 2023, and challenges and opportunities going forward. The data and analysis ...

Energy storage subsidies in Poland for 2024-2025 support the country's energy transition, increasing RES efficiency and grid stability.

# Analysis of the current situation of energy storage industry in poland

The article aims to present the 2050 Energy Policy for Poland, which should facilitate the transformation of coal-based electricity generation system towards more ...

In the public sphere, the term green energy is used in all contexts. It is on the lips of politicians, opinion leaders, many experts, environmentalists, and social activists working to ...

This analysis looks at Poland's progress on electricity transition in 2023, and challenges and opportunities going forward. The data and analysis is based on Ember's ...

The Energy Regulatory Office said in a report last year on electricity storage in Poland that, as a result of the main power market auctions for 2021-2028 and the ...
