

A\$20.3 million for Building Future Battery Capabilities to incentivise cutting-edge battery research, including support for: Future Battery ...

The National Battery Strategy is a key part of the government's Future Made in Australia agenda. The strategy will improve Australia's resilience and security and drive ...

DISCLAIMER This report has been prepared by Aurecon at the request of the Australian Renewable Energy Agency (ARENA). It is intended solely to provide information on the key ...

The Collie site itself was identified as an ideal spot to host large-scale battery storage due to its existing transmission network infrastructure and local workforce with relevant ...

In 2025, Australia is accelerating its shift to renewable energy by expanding large-scale battery storage projects nationwide. Discover how this battery boom is transforming the energy sector ...

Australia saw a surge in investments and rapid growth in Battery Energy Storage Systems (BESS). Find out how it supports Australia's net-zero ...

Enhancing Regional Energy Security: Providing Australia's power grid with greater stability and resilience. Future Prospects for Energy Storage in Australia With the ...

Capital costs for large-scale BESS improved the most out of the energy transition technologies. Image: Fluence. A new report published by ...

A new report has predicted that Australia is on the cusp of a big battery boom that could deliver 18 gigawatts (GW) of installed energy storage capacity by 2035 - ...

Would you like to meet the enervis team? Enervis consultants will be speaking at the Battery Business & Development Forum in Frankfurt on ...

A volatile power market, supportive government policies, and looming coal plant retirements are driving uptake of utility-scale batteries in ...

A newly formed Australian renewables and storage developer has unveiled its first four battery projects in NSW and Victoria.

In general, energy density is a key component in battery development, and scientists are constantly developing new methods and technologies to make ...

One of the world's largest batteries at 1.2 GW / 2.4 GWh has been approved by Australia's federal government for a site in Melbourne's ...

A surge in investment in large batteries is helping to safeguard Australia's energy future but experts say the trend could be threatened by a ...

French renewables developer Neoen is set to build Australia's largest battery in Collie, a 560 MW, four-hour duration storage system [vi]. ...

The volume of large-scale battery energy storage projects under construction in Australia passed that of solar and wind projects ...

Developer ACEnergy has seen its 350MW/770MWh Little River battery energy storage system fast-tracked by the Victoria government in Australia.

Image: Quinbrook Infrastructure Partners Global sustainable energy infrastructure investor Quinbrook Infrastructure Partners has ...

Interest in owning big batteries is a growing trend for electric companies and coal-plant owners as market revenue potential improves, particularly for newer, longer-duration ...

Australia's electricity market is rapidly adding renewable energy generation. Utility-scale batteries could have a major role in facilitating these transitions; however, their ...

Australia saw a surge in investments and rapid growth in Battery Energy Storage Systems (BESS). Find out how it supports Australia's net-zero goals.

Would you like to meet the enervis team? Enervis consultants will be speaking at the Battery Business & Development Forum in Frankfurt on July 16, organized in partnership ...

Lithium-ion battery storage, such as the pictured project, is likely to dominate energy storage applications of up to 4-hours in durations. Image: ...

One of the biggest batteries under development in Australia - and one of the first eight-hour batteries to be underwritten by NSW government - has locked in a ...

This paper empirically examines the impacts of grid-scale battery storage facilities on the frequency control

ancillary services (FCAS) market that is used by energy market ...

4 · Australia ranks among the world's highest in solar penetration, with residential PV systems reaching nearly 30% adoption. However, compared to solar installations, energy ...

Adelaide, Australia - Amp Energy ("Amp"), a global energy transition platform backed by the Carlyle Group, has successfully closed ...

11 · A second major renewable energy development in Victoria's North East has been granted state government approval despite fierce local community opposition.

The Merredin Battery Energy Storage System (MEB) is a 100MW/four-hour large-scale grid-connected energy storage project under development in Western Australia, ...

The government of Western Australia (WA) announced last week (15 March) that the construction phase has begun at Collie, a battery ...

The \$50 million Grid Scale Storage Fund and South Australia's Virtual Power Plant are key components of the South Australian government's energy policy. Existing Energy Storage ...

Developer ACEnergy has seen its 350MW/770MWh Little River battery energy storage system fast-tracked by the Victoria government in ...
