

Average solar cost per kwh phoenix arizona 2019

How much does it cost to install solar panels in Phoenix?

The average cost to install solar panels in Phoenix after \$3,000 in federal tax credits and \$1,000 in Arizona state tax credits was approximately \$11,670 in 2019.

How much does solar cost in Arizona?

Take control of your energy costs with solar power. A typical solar panel installation in Arizona costs \$7,560 to \$21,600. How much you actually pay depends on the size of your system, what incentives you're eligible for, sunlight exposure and other factors.

How much electricity does a solar system use in Phoenix?

An average home in Phoenix, Arizona consumes about 1,061 kWh per month, which means an average homeowner needs about a 6 kilowatt (6,000 watt) solar system to cover their electricity consumption. Your system size and cost may vary based on your yearly power usage. The average payback time is about 7 years.

Is solar in Arizona worth it?

Thanks to plenty of sunlight, many solar-friendly policies and relatively cheap solar installation costs, going solar in Arizona is usually worth it. Assuming an upfront purchase, it takes about 10.97 years on average to break even (that's when your utility-bill savings catch up with the system cost).

How much does a solar panel system cost?

The size of your solar panel system is a big factor in your total cost. On the higher end, Patrick in Tucson said his system cost \$36,000, and Simin in Scottsdale paid over \$40,000 for a large solar panel system. The table below doesn't include the cost of a solar storage battery, which sometimes costs as much as the panels.
