

Battery booster solar

What is a solar power booster?

The EverForce Solar Power Booster is designed to increase the output of a Photovoltaic (PV) panel by an average of 45%, thus significantly increasing the overall output of a PV system. The Solar Power Booster is compatible with all commercially available PV panels used in small (household), medium (commercial), and large (solar farm) PV systems.

What is a battery booster?

A battery booster is a device that 'boosts' the output power of the buoy's batteries. It holds a small array of very large capacitors that are capable of supplying the high power pulses as drawn by some of the buoy's options, such as Orbcomm and Iridium.

How does the solar panel Charge Kit work?

With the optional Solar Panel Charge Kit, you can harness solar energy to charge your vehicle's battery and other devices, even when you're miles away from a power outlet. Whether you're camping, boating, or exploring the great outdoors, the CS FREE ensures you stay connected and your vehicle's battery remains charged.
