How much does a solar battery cost?

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. You can expect to pay between \$7,000 and \$18,000 for a solar battery.

Are solar batteries worth it?

Solar batteries typically cost \$10,877 after the federal tax credit--which expires for batteries installed after December 31, 2025--for the 13.5 kilowatt-hours (kWh) of storage a typical home needs to keep essential devices running during outages (also the size of a Tesla Powerwall 3). Whether they're worth it depends entirely on your situation.

How much does it cost to install a solar battery in 2025?

The average cost to install a solar battery in 2025 is between \$9,000 and \$19,000, with the average homeowner paying around \$13,000 on average.

Can solar batteries save you money?

Solar batteries can also save you money on utility power long-term. When utility costs are at their peak, you can pivot your home's energy consumption to run off of battery power rather than grid power, leveraging the electricity your solar panels generated when you need it most.

Is solar battery storage worth the cost in 2025?

Whether solar battery storage is worth the cost in 2025 is totally up to you and your energy goals. If you experience frequent or long-lasting power outages, then having battery storage for backup power can be a game-changer in keeping you safe, productive, and comfortable (not to mention keeping your food from spoiling!).

Why are solar batteries so expensive?

There are a handful of factors that influence the price of solar batteries, but perhaps the greatest reason they are expensive is simply because residential-scale batteries are a newer technology, and new technologies tend to be expensive at first before rapidly falling in price as the market matures.
