

# Battery prices solar

How much does a solar battery cost?

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. You can expect to pay between \$7,000 and \$18,000 for a solar battery.

What factors determine the cost of a solar battery?

Here are some of the factors that determine the cost of a solar battery: Any solar-related product's price tag will depend on the company that manufactures them. This goes for inverters, batteries, panels, EV's, etc. This can come down to their manufacturing process, marketing strategy, material cost, and other various overheads.

Are solar batteries worth it?

Solar batteries typically cost \$10,877 after the federal tax credit--which expires for batteries installed after December 31, 2025--for the 13.5 kilowatt-hours (kWh) of storage a typical home needs to keep essential devices running during outages (also the size of a Tesla Powerwall 3). Whether they're worth it depends entirely on your situation.

Why are solar batteries so expensive?

There are a handful of factors that influence the price of solar batteries, but perhaps the greatest reason they are expensive is simply because residential-scale batteries are a newer technology, and new technologies tend to be expensive at first before rapidly falling in price as the market matures.

Which solar batteries are the most expensive?

In this article, we've included prices for both lithium-iron (LiFePO<sub>4</sub>) and lead-acid (AGM & GEL) solar batteries. Out of the 3, LiFePO<sub>4</sub> batteries tend to be the most expensive - at least initially. Over time, they actually save you money because they last longer.

How much does a battery cost on EnergySage?

On EnergySage, Pytes USA Energy offers some of the most affordable batteries at about \$651/kWh. You'll typically pay the most for Enphase batteries, which cost about \$1,510/kWh. \*The average price per kWh of the 10 most quoted batteries on EnergySage in the first half of 2025 (excluding Panasonic, which is closing its solar and storage business).
