

Bedini solid state battery charger

What is the Bedini SG Forum?

Read this first by Tom C This forum is the Official Bedini SG forum for the basic SG, SSG, Dual Battery Charger, solid state oscillators, motor kits and other SG related circuits designed by John Bedini. It also continues the discussions from the old Yahoo Monopole 1, Monopole 2, and Monopole 3 Groups.

How good is a Bedini SG battery?

With the Bedini SG, a very good build can wind up with 85-95% in the back battery. Let's say 90% recovery.

Does Bedini solid state oscillator work based on SSG circuit?

Bedini Solid State Oscillator complete assembled charger based on the SSG circuit. SSG circuit completed. "I am using the single coil board and it works great.."

Can a Bedini Charger be made in undeveloped countries?

Because this Radiant Charger could help millions of suffering people all over the world, we could expect that a special 'free license' to manufacture it in undevelopped countries will be accorded; because the population of at least 100 countries in the world just CAN'T AFFORD to buy one Bedini Charger at a cost superior to a few hundred dollars.

What is a John Bedini Energizer?

Based on John Bedini's classic bicycle wheel Energizer, this kit is authorized by John Bedini. John designed the circuit himself to make sure that it is built correctly and will perform the same as his. All circuits are tested before they are shipped. What's included... High quality laser cut adjustable plastic frame that comes partially assembled.

How does John Bedini's radiant battery charger work?

John Bedini's radiant charger uses voltage pulses with peak voltages much higher than conventional battery chargers. Secondly he shows that it is better to charge many batteries (that contain much Q) simultaneously with one radiant battery charger. This is in perfect agreement with power term $P = dV/dt Q$.

Abstract: A two-phase solid-state battery charger can receive input energy from a variety of sources including AC current, a battery, a DC generator, a DC-to-DC inverter, solar ...

Abstract: A two-phase solid-state battery charger can receive input energy from a variety of sources including AC current, a battery, a DC generator, a DC-to-DC inverter, solar cells or any other compatible source of ...

This model is nothing more than an up-scaled Bedini solid state SG that's running on a 3 battery power supply. Anyone "experienced in the art" could build it and see ...

Bedini solid state battery charger

The Bedini SSO charger is compatible with a wide range of battery types, including lead-acid, lithium, and nickel-cadmium, ensuring that it can be used in various applications. In addition to ...

These printed circuit boards are based on John Bedini's Simple School Girl (SSG) circuit. The SSG circuit is the key to producing IMPULSES, which is the key to the extraordinary output ...

It converts the high voltages impulses from the Bedini SG coil into steady Direct Current that can charge and rejuvenate sulfated batteries. And if you have new batteries, it simply keeps them ...

The principle is alike Bedini generator, but this one is solid state. The frequency is up to 2KHz. And you can change it by turning the button clockwise or counterclockwise, therefore changing ...

Did you know that conventional chargers are designed to cause your batteries to fail? Learn why your batteries will love our chargers and save you money.

It converts the high voltages impulses from the Bedini SG coil into steady Direct Current that can charge and rejuvenate sulfated batteries. And if you have new batteries, it simply keeps them in like-new shape.

It provides an efficient way to charge batteries without waste and can rejuvenate batteries that other chargers cannot, helping to reduce electronic waste. The document promotes the ...
