

# Best solar car battery trickle charger uk

What is a solar trickle charger?

Solar trickle chargers can regulate the amount of charge that flows into the battery. This is important because it prevents overcharging, which can damage the battery. Unlike conventional solar car battery chargers, solar trickle chargers are designed to provide a constant, low-level charge to the battery, hence the term "trickle."

What is the best car battery charger?

1. Photonic Universe 10W Solar Trickle Charging Kit 2. OptiMate Solar 20W 3. AA Car Battery Solar Charger/ Halfords 2.4W Solar Maintainer Firstly, a word of warning.

Can you leave a solar trickle charger connected to a battery?

Yes, you can generally leave a solar trickle charger connected to a battery all the time. In fact, this is one of the primary advantages of using a solar trickle charger.

How do I choose a trickle charger?

The key to maximising the benefits of a trickle charger lies in choosing one that aligns with your specific requirements--be it for an EV, a car, a motorcycle, or a boat. Features like automatic shut-off, overcharge protection, and compatibility with various battery types are crucial for ensuring both safety and efficiency.

Do you need a trickle charger for a car battery?

A trickle charger is a great tool for car batteries that discharge quickly and on vehicles that don't see regular use; such as classic cars, weekend vehicles and motorhomes that can sit dormant for several months in the year. It's important to maintain the condition of your car's battery to ensure it doesn't degrade sooner than you'd expect.

Which solar charger should I buy?

The PV Logic is easy to use and store and performed well at a reasonable price. For use outside the car, the Photonic Universe 10W would be our choice, with the Topsolar panel close behind. Solar chargers are incredibly useful but should the worst happen then you will need a jump starter pack.
