

British energy storage support policy

Could a new energy storage scheme help the UK achieve energy independence?

The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure. This could see the first significant long duration electricity storage (LDES) facilities in nearly 4 decades, helping to create back up renewable power and bolster the UK's energy security.

What is the long duration energy storage Investment Support Scheme?

Long Duration Electricity Storage investment support scheme will boost investor confidence and unlock billions in funding for vital projects. The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure.

What is the British Energy Security Strategy (BESS)?

The government therefore committed in the British Energy Security Strategy (BESS) to encouraging all forms of flexibility with sufficient large-scale, long duration electricity storage to balance the overall system by developing appropriate policy to enable investment, with this consultation setting out the proposed approach.

What is the European Commission doing about energy storage?

The European Commission in 2020 published a study on energy storage, which summarized some previous studies and reports, explored current and potential energy storage markets in Europe, and set out policy and regulatory recommendations for energy storage.

What if the UK has a strong energy storage industry?

If the UK establishes a strong domestic energy storage industry, it can export storage capacity and technologies. Storage would reduce the UK's dependence on costly, polluting and uncertain fossil fuel imports. Great Britain currently has 2.8 gigawatts (GW) of LDES across four Pumped Storage Hydro (PSH) facilities in Scotland and Wales.

What is the future of energy storage in the UK?

The UK's energy storage market continues to experience strong growth. In 2024, operational capacity of energy storage resources was 4.6 GW/5.9 GWh, which was projected to increase to 7.4 GW/11.6 GWh by the end of 2024. Moreover, the future looks promising, with total planned capacity for energy storage projects of 85 GW/175 GWh.

On 23 May 2023, we announced our first debt transaction in battery storage, with a £62.5 million commitment to support the development of multiple new storage and grid stability facilities ...

The UK should not lose out on an opportunity to become a leader in utility-scale BESS (pictured), argues Nick Bradford of Atlantic Green. ...

British energy storage support policy

To drive forward investment in clean, home-grown energy production, Labour will create a new publicly-owned company, Great British Energy. It will be owned by the British people and ...

On 10 October 2024 the UK Government gave the green light to a cap and floor scheme to help bring long duration energy storage (LDES) projects to market. ...
