

# Can medicine storage boxes be sterilized at high temperatures

What temperature should medicine be stored?

All medicine comes with label instructions regarding safe temperature for medication storage. In general, most medicines should be stored at 59 to 77 degrees F in a cool, dry place, away from sunlight. That temperature range is important.

How should sterile supplies be stored?

Finally, your organization may refer to evidence-based guidelines and national standards (EBGs) for guidance as to how sterile supplies should be stored. Most EBGs agree that sterile supply areas must be clean, well ventilated and protect supplies from contamination, moisture, dust, temperature extremes, and humidity extremes.

How are medical devices stored after sterilization?

(HAP) After sterilization, medical devices and instruments are stored so that sterility is not compromised. (ASC and HAP) Sterile packages are inspected for integrity and compromised packages are repackaged and reprocessed prior to use. Next, organizations must be compliant with the manufacturer's instructions for storage.

What is a good humidity storage range for sterile packaging products?

Although not considered best practice by ASHRAE, the IFUs of many sterile packaging products used in hospital sterile processing departments almost always list humidity storage ranges at 30%-60%.

Why should you use a sterile storage unit?

Sterile storage units do not just create a barrier between items and potential contaminants like dust, dirt, viruses, or bacteria. They regulate the temperature and humidity to prevent degradation and increase the shelf life of stored goods.

What is the maximum temperature for sterile storage?

The current ASHRAE Standard 170 guidelines specify a maximum temperature of 75°F and a maximum relative humidity of 60% for sterile storage. Past ASHRAE 170 Standards listed temperature ranges as 72 degrees F to 78 degrees F. In the AAMI ST 79: 2017 guidelines, temperature and humidity recommendations were removed in favor of the ASHRAE standards.
