

Casio tough solar battery lifespan

How long does Casio solar and rechargeable battery last?

How long is the life of Casio solar and rechargeable battery? You ask: What is the life of the solar cell and the rechargeable battery? Casio answers: Normally, the solar cell and rechargeable battery should be able to last as long as the watch.

How long does a solar watch battery last?

The typical Casio answer (it should last for at least as much as the watch itself lasts for) is totally vague. Casio solar cells will last the life of the watch, 20 years, if charged periodically. Some of these are now 22 years old, on original battery, still holding full charge. Still have never changed a solar watch battery.

How long do Casio watches last?

Theoretically, the capacitor should be very long lasting. But once it fails, so is the whole watch. As for Casio watches with a solar rechargeable battery, they have a lot of power reserve (months) and usually also last a very long time if well maintained. There are members here who mentioned their solar watches last more than 20 years.
