

# Cec energy storage

What does CEC stand for?

For Immediate Release: December 13, 2023 SACRAMENTO -- The California Energy Commission (CEC) today approved a \$30 million grant to Form Energy to build a long-duration energy storage project that will continuously discharge to the grid for an unprecedented 100 hours.

What does CEC do?

CEC provides energy and commodity sector customers with a comprehensive service platform by Empowering People to Power Communities. CEC is proud to serve alongside its customers; many of which are some of the most reputable companies in the world. CEC has a strong focus on clear communication and disciplined project management.

Why is energy storage important?

Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers. Energy storage is essential to a resilient grid and clean energy system.

What makes CEC a good company?

CEC is proud to serve alongside its customers; many of which are some of the most reputable companies in the world. CEC has a strong focus on clear communication and disciplined project management. Our workmanship is systematic, and our commitment to customer satisfaction is evident in every aspect of our work.

Should energy storage be included in the electric grid?

Integrating storage in the electric grid, especially in areas with high energy demand, will allow clean energy to be available when and where it is most needed. As New York continues to invest and build a cleaner grid, energy storage will allow us to use existing resources more efficiently and phase out the dirtiest power plants.

Long-duration storage could balance energy across days and seasons and reduce renewable curtailments, a report from the California Energy Commission found.

CEC Energy has qualified and experienced personnel to help install renewable infrastructure, maintain the local power grid, and support new energy storage ...

SACRAMENTO -- The California Energy Commission (CEC) will hold a public meeting on the proposed Compass Energy Storage Project in San Juan Capistrano. The ...

To facilitate the future installation of battery storage systems, newly constructed single-family buildings with one or two dwelling units are required to be energy ...
