

Changing the battery in ring solar security yard sign

What battery does the ring solar security sign use?

The Ring Solar Security Sign uses a LiFePO4 14430 3.2V 400mAh battery. It is powered by sunlight and requires a few hours of direct sunlight every day for it to have enough power to light up at night.

How does a solar security sign work?

Warn crooks that your home is off-limits and stop crime before it happens with the Solar Security Sign. Just a few hours of sunlight everyday will keep your Sign charged all night,so your neighborhood will know that your home is protected by Ring. Soft surface for mounting.

How do you install solar panels on a sign?

Lift each of the LED units off the 2 plastic pins holding each in place. The solar panels are adhered to the outside of the sign. The wires for the solar panels extend through a hole in the plastic. Be careful of the solder where the wires are connected to the panel. The panels need to be peeled off, but gently.
