

# Coleman 4w solar battery trickle charger review

Is the Coleman 4W solar battery trickle charger safe?

If it is safe, what is the advantage? A: The Coleman 4W Solar Battery Trickle Charger is safe to use with the OBD II connector as it is designed to charge 12V batteries through this port. The advantage is an additional method of charging for those who cannot access a live 12V port in their vehicle.

Why should you use a solar trickle charger?

Using a solar trickle charger will help ensure your battery lasts as long as possible and keep the battery ready to go if storing the vehicle for months. This is also good for your battery in the long-term, as keeping it fully-charged can help to extend the life of your car battery.

What is the best solar trickle charger?

Best mid-range option - Renogy 12V 10W Solar Battery Maintainer One of the best solar trickle chargers for those who want a mid-range option, the Renogy 12V is an excellent choice, offering great value-for-money with a modest investment. It has a decent 10-watt solar panel that will produce plenty of power to maintain your 12-volt battery.

What is a solar trickle charger & maintainer?

Solar trickle chargers are an efficient and sustainable way to ensure your vehicle battery stays fully charged and avoid discharge and other problems. Our absolute favorite is the ECO-WORTHY 12V 10W Solar Car Battery Charger & Maintainer, with our other top picks listed below! Simple "plug and play" cigarette lighter connector.

What are the safety features of a solar trickle charger?

Safety features: Including a built-in diode and charge indicator. Lower power: The charger only delivers five watts of power, less than most trickle chargers. Although this budget solar trickle charger only delivers a modest five watts, this will be enough to maintain a 12-volt battery over the short to medium term.

What is a trickle battery charger?

Unlike regular chargers that fully recharge batteries, a solar powered trickle battery charger delivers a slow, steady flow of power to maintain battery health without overcharging. The main difference is in purpose--regular solar chargers restore drained batteries quickly, while trickle chargers prevent battery drain during long storage.
