

What is compressed air energy storage (CAES)?

Compressed air energy storage (CAES) is an effective solution for balancing this mismatch and therefore is suitable for use in future electrical systems to achieve a high penetration of renewable energy generation.

How can I save energy in my compressed air system?

Applying best energy management practices and purchasing energy-efficient equipment can lead to significant savings in compressed air systems. Use the software tools, training, and publications listed below to improve performance and save energy. Submit your email address below to receive the latest AMO news and events.

What are the different types of air storage systems?

Besides the classification of D-CAES, A-CAES and I-CAES, several novel CAES systems are also proposed in recent years, such as compressed air storage with humidification (CASH), underwater CAES (UWCAES), liquid air energy storage (LAES), and supercritical CAES (SC-CAES).

Where is compressed air stored?

Compressed air is stored in underground caverns or up ground vessels. The CAES technology has existed for more than four decades. However, only Germany (Huntorf CAES plant) and the United States (McIntosh CAES plant) operate full-scale CAES systems, which are conventional CAES systems that use fuel in operation.

Can compressed air energy storage improve the profitability of existing power plants?

New compressed air energy storage concept improves the profitability of existing simple cycle, combined cycle, wind energy, and landfill gas power plants. In: Proceedings of ASME Turbo Expo 2004: Power for Land, Sea, and Air; 2004 Jun 14-17; Vienna, Austria. ASME; 2004. p. 103-10. F. He, Y. Xu, X. Zhang, C. Liu, H. Chen

Which type of energy storage system is best?

The D-CAES and A-CAES systems are suitable for grid-scale energy storage applications (~ 100 MWh and ~ 1000 MWh), and a small CAES system may choose the system type between A-CAES and I-CAES. Among the three system types, D-CAES systems have the highest degree of technology maturity and the lowest capital cost.
