

# Cost of solar batteries for homes

Are solar batteries worth it?

Solar batteries may be worth it if you: Depend on a backup battery for your medical equipment. Live in an area prone to power outages. Work from home and need access to your devices and internet, rain or shine. Want to lower your carbon footprint and have a zero-energy home. Don't have net metering. Live off-grid and depend on backup storage.

How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

How much does it cost to install a solar battery?

Labor to install a solar battery costs \$2,000 to \$3,000 on average. Labor costs are lowest when installing a battery at the same time as a solar panel system. Retrofitting an existing system to add a new battery can increase labor costs by 30% to 50%. Solar battery installation may require additional electrical work:
