

Cost of solar batteries in australia

How much does a solar battery cost in Australia?

Let's break down the real costs, the influencing factors, rebates, and whether investing in battery storage is a smart move today. The average solar battery price (installed) in Australia in 2025 is sitting between \$800 and \$1,200 per kWh. That means for a standard 10kWh system, you'll typically pay between \$8,000 and \$12,000 installed.

How much does a 10 kWh solar battery cost in Australia?

The average price for a 10 kWh solar battery ranges between \$8,000 - \$10,000. While the uptake of solar panels in Australia is really strong, the same cannot be said for solar batteries. A newer technology, battery storage has been viewed as expensive - especially when comparing the payback of a battery system against its expected life.

Why is the solar battery price falling in Australia?

Thanks to many innovators (some who've now got their sights set on Mars), the solar battery price in Australia has plummeted. Supply chain issues due to COVID have definitely curbed that trend recently, but as the world emerges from lockdowns, the solar battery price has started to decline once again.

How much does a solar battery cost?

Thanks to falling prices and the federal battery rebate, thousands of households can now expect payback within the warranty period, particularly if they use a lot of power at night or join a Virtual Power Plant. In summary: Price Range: Popular solar batteries have an installed cost between \$8,000 and \$13,000 including the federal rebate.

Are batteries worth it in Australia?

We've been tracking the financial return of batteries in Australia for over a decade and regularly update our analysis of whether batteries are worth it. At the midway point of 2025 was a key turning point in this equation as the federal battery rebate was introduced which offers a discount of around 30% for a typical 10kWh battery.

Is a solar battery a smart upgrade for Australia's 4 million homes?

With electricity prices up 20% in NSW and Queensland since 2023, a solar battery is a smart upgrade for Australia's 4 million solar homes. The federal Cheaper Home Batteries Program slashes costs, making now the perfect time to invest.
