

Cost per kwh of solar in washington

How much do solar panels cost in Washington?

As of January 2025, the average solar panel system costs \$2.58/W including installation in Washington. For a 5 kW installation, this comes out to about \$12,901 before incentives, though prices range from \$10,966 to \$14,836. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.

How much does a 5 kW solar system cost in Washington?

While a 5 kW system will only cost you \$12,901 in Washington, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in Washington?

How much do solar panels cost?

The cost of solar panels in Washington is lower than the average price of \$3.00 per watt for residential solar power systems across the United States. The size of a solar panel system influences the installation cost, as larger installations can benefit from bulk pricing, resulting in a lower cost per watt.

How much does a solar array cost in Washington?

While the average solar array in Washington costs around \$23,520 after the federal solar tax credit, prices typically range from \$16,464 up to \$30,576. The potential range is so wide because there are a handful of factors that can have an influence on the total. These include the following:

Do solar panels need maintenance in Washington?

Thankfully, there are virtually no required maintenance costs for solar equipment in Washington. Some homeowners get their panels washed one to two times per year to keep pollen and dirt off of the surface.

Are solar panels a viable option in Washington?

Washington is well-known for its cloudy and rainy weather, which leads many people to believe that solar power isn't a viable option. While the climate is a challenge, solar panel systems in the area still pay off in a big way.
