Should you add a battery to your commercial solar system?

Adding a battery to your commercial solar system can completely transform how your company uses electricity, providing cost savings, energy independence and resilience, and increased sustainability. Let's take a closer look at why a commercial energy storage system makes a smart investment.

Do you need a commercial solar battery storage system?

If you make more energy than you need, you might only sometimes use it all at once, so plan what to do with it. With a commercial solar battery storage system, you can store excess energy and use it during power outages or at night and in cloudy weather.

Can solar batteries improve your commercial solar power setup?

Solar energy storage is becoming increasingly essential for businesses looking to cut energy costs and take control over their energy usage - let's look into how solar batteries can improve your current commercial solar power setup. Energy storage shields your business from power outages.

Does solar battery storage increase the cost of commercial solar installation?

Solar battery storage can increase the upfront costs of your commercial solar installation. This includes the cost of the batteries themselves as well as installation and any necessary upgrades to your existing solar infrastructure.

What is the best commercial solar battery installation solution?

Solar Earth offers the best commercial solar with commercial solar battery installation solutions to individual energy needs. Buying solar batteries is an expensive up-front investment, but they pay for themselves over time by saving you money on energy costs, especially in situations and after dark.

Do you need more than one solar battery for your business?

When planning your system, factor in the potential need to replace batteries in the future as well as the costs associated with professional maintenance. Depending on your business, you might need more than one solar battery to meet energy demands. These commercial energy storage systems can take up a fair amount of space.
