We offer many sizes and configurations of battery cables which you can custom design here on the site. The battery cables are organized by wire gauge size below. If you don't see a cable style you need please email or call us and we'd be glad to help design the cable for you.

Are custom battery cables worth the money?

Thank you for considering Custom Battery Cables, LLC. ~ Vince Founder and Owner, Customer Battery Cables Wonderful thick cables you can tell the difference the moment you crank the engine over. Very well made and will last longer than my jeep at this point. Well worth the money for a professional product. A model of a customer-focused organization!

Who makes the best aftermarket battery cables?

At CustomBatteryCables.com we build the best aftermarket cables available. I started building battery wires for heavy equipment and my own trucks more than 20 years ago. During that time, I can't recall ever having to replace a cable due to overheating. Why? Because I build 'em better by using the best components and better construction techniques.

What kind of wire do I need for a solar panel?

But you have come to the right place to get the right kind of wire for your specific application. The wire (or conductors) listed below includes standard PV wire to connect the leads from the solar panels, or USE-2 or THHN conductors rated for home-run lengths from your array combiner box to your charge controller or inverter charger.
