

Deka solar battery gel 8g31

What type of batteries is the Deka 8G27 a direct replacement for?

The Deka 8G27 (8G27M) is a direct replacement for any group 27 lead-acid, GEL, or AGM batteries. These are manufactured by East Penn Manufacturing who also manufactures batteries under the name MK Battery.

Why should you choose Mk 8g31-deka solar valve-regulated gel monobloc?

The MK 8G31-DEKA Solar Valve-Regulated GEL Monobloc series offers reliable, versatile, maintenance-free power. The thixotropic gel enables these batteries to be completely spillproof providing many available options for installation. The gelled electrolyte gives more protection to the battery plates, and is better suited for deep cycle discharge.

What is a Deka 8a31dtm battery?

The Deka 8A31DT (8A31DTM) is an American made AGM (absorbed glass-mat) deep cycle battery. The AGM technology allows for a completely sealed maintenance-free battery with no sulfuric acid leaks, no acid clean up, and more power in the same space when compared to conventional batteries. It has an under 2% per month self discharge rate.

What makes Mk / Deka solar batteries different?

Advanced American Technology and the use of the most modern computer-aided design and manufacturing techniques combine to make MK /Deka Solar batteries the standard by which all other solar batteries are measured. Our Solar VRLA Sealed Batteries are the best the PV /Solar Battery market has to offer. About MK Battery

Why is the Mk 8g31-deka battery thixotropic?

The thixotropic gel enables these batteries to be completely spillproof providing many available options for installation. The gelled electrolyte gives more protection to the battery plates, and is better suited for deep cycle discharge. With longer discharge and less charging time, the MK 8G31-DEKA is ideal for many renewable energy applications.

MK Battery provides the highest quality and most environmentally responsible sealed battery solutions for specialized deep-cycle and standby power applications.
