

# Do solar watch batteries go bad

Do solar-powered watches need batteries?

A solar-powered watch needs to have a battery to store the electrical energy that has been converted from light by the solar cells. This battery can be either a rechargeable or non-rechargeable battery such as a lithium-ion, nickel metal hydride, or alkaline. Some manufacturers, like Citizen, claim their solar watches don't use batteries.

Can a solar watch run out of battery?

But, of course, there's an exception. If you leave the solar watch in a dark place for too long, say upward of six months, you may need to replace the battery. But as long as the watch is getting adequate sun exposure, among the perks of using a solar watch is that the battery never runs out, even when you have abandoned it for too long.

Are solar watch batteries replaceable?

Most solar watches have replaceable batteries, but the odds of having to get the battery changed out are very low. With proper care and maintenance, solar watch batteries are designed to last for nearly a lifetime.

How long do solar watch batteries last?

Ultimately, if it stores energy...which is an essential function in a solar watch...it's a battery, and all solar watches need one. Solar watch batteries are rated to last around 10 years, however, many can last for several decades depending on usage. Even if you overly strain the watch's functions, you should still get upwards of 9 years out of it.

Should you buy a solar watch?

Low prices encompass the short-term benefits while the sheer longevity of the battery and watch offers all of the benefits of an affordable, long-term value. Most solar watches have replaceable batteries, but the odds of having to get the battery changed out are very low.

How much does it cost to replace a solar watch battery?

But if your solar watch battery is somehow damaged, replacing it will cost \$30. Solar watch batteries are usually durable and can last five years and sometimes more. However, factors like moisture or water, dirt, and sweat can cause depreciation. Water damage is especially an enemy to solar watch batteries because it causes rust.

Discover whether you can replace a solar watch battery and learn the best steps to keep your timepiece running smoothly. This guide explains the process, tools needed, and tips to extend ...
