

Energy storage industry stocks 2023

Is the energy storage industry ready for success in 2023?

The energy storage industry is well-positioned for success in 2023, as a wave of positive changes in the energy landscape means more investment, innovation, and growth.

Will 9% of energy storage capacity be added by 2030?

We added 9% of energy storage capacity (in GW terms) by 2030 globally as a buffer. The buffer addresses uncertainties, such as markets where we lack visibility and where more ambitious policies may develop that we haven't predicted. We revised our buffer calculation methodology in this market outlook.

How much money will be allocated to storage projects in 2023?

Residential batteries are now the largest source of storage demand in the region and will remain so until 2025. Separately, over EUR1 billion (\$1.1 billion) of subsidies have been allocated to storage projects in 2023, supporting a fresh pipeline of projects in Greece, Romania, Spain, Croatia, Finland and Lithuania.

Where can energy storage be used for capacity services?

Markets are increasingly seeking energy storage for capacity services (including through capacity markets). Japan, Poland, the UK, Chile, the US Southwest, New York and Australia are new markets opening up these opportunities.

Is Bloom Energy a good energy storage stock?

Bloom Energy is one of the smaller picks on this list, but it may be the most dynamic energy storage stock out there. It specializes in advanced fuel cell energy platforms, which use a proprietary solid oxide technology to convert natural gas, biogas or hydrogen into electricity with low or even zero carbon emissions.

Which countries are implementing new capacity auctions for energy storage?

South Korea will hold an auction for storage to reduce renewable curtailment and published a new policy to revive its commercial storage sector. Australia and Japan are both executing new capacity auctions for clean firm capacity which benefit energy storage installation by providing long-term capacity payments.

Let's face it - if new energy storage stocks were a Netflix show, they'd be trending at #1 right now. With the global energy storage market zooming toward \$546 billion by 2035 (BloombergNEF ...
