

5 &#0183; China aims to install more than 100 GW of new energy storage - primarily battery storage, excluding pumped hydro - by 2027, according to a new action plan presented by ...

A NineDot Energy battery storage site in New York City. Image: NineDot Energy Energy storage developer NineDot has announced the closing ...

Technology could boost renewable energy storage Columbia Engineers develop new powerful battery "fuel" -- an electrolyte that not only lasts longer but is also cheaper to ...

Form Energy, a company beginning to produce a longer-lasting alternative to lithium batteries, hit a milestone Wednesday with an announcement of \$405 million in funding.

Tesla has unveiled two new energy storage products: Megapack 3, the latest generation of its utility-scale energy storage system, and Megablock, which integrates ...

4 &#0183; Annual roster reflects top-tier suppliers across energy storage, solar, and wind ARLINGTON, Va., Sept. 17, 2025 (GLOBE NEWSWIRE) -- Fluence Energy, Inc. (&quot;Fluence&quot;) ...

The record stood at -424MW a year ago, achieved at 12:55 on 5 May 2024, 66.2% below the new record. Victoria becomes the latest state to achieve records in relation to ...

New research finds liquid air energy storage could be the lowest-cost option for ensuring a continuous power supply on a future grid ...

2 &#0183; Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy ...

The U.S. energy storage market is stronger than ever, and the cost of the most commonly used battery chemistry is trending downward each ...

Applications are invited for New York's first competitive solicitation for a gigawatt of grid-connected energy storage facilities.

5 &#0183; China plans to more than double its battery storage capacity by 2027 with a new \$35.1 billion investment to support its growing solar and wind power generation.

The U.S. energy storage market is stronger than ever, and the cost of the most commonly used battery

chemistry is trending downward each year. Can we keep going like ...

ETN news is the leading magazine which covers latest energy storage news, renewable energy news, latest hydrogen news and much more. This magazine is published by ...

India Energy Storage Alliance (IESA) is the premier alliance working for the promotion of advanced energy storage and e-mobility technologies in India.

14 &#0183; The Plan positions solid-state batteries as a core driver for breakthroughs in new-type energy storage technology, promoting their transition from the laboratory to large-scale ...

2 &#0183; The new energy storage technology roadmap will continue to prioritize lithium-ion battery storage, while further diversifying various technical ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

The company's energy storage systems provide safer and flexible power solutions for businesses, industrial, and... The company's energy storage systems provide safer and flexible power ...

5 &#0183; China plans to more than double its battery storage capacity by 2027 with a new \$35.1 billion investment to support its growing solar and wind power ...

5 &#0183; China is looking to almost double its so-called new energy storage capacity to 180 gigawatts (GW) by 2027, according to an industry plan ...

Actively Exploring Energy Storage Application Scenarios In the era when the industry is fully shifting toward marketization, the reform of the ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two ...

Get insights into energy storage technologies, battery advancements, and grid solutions shaping the future of clean energy at Renewable Wire.

The most important energy storage, battery, and electric vehicle news, events, and technology product update are exclusively from ETN News.

Grid-scale storage deployments alone are expected to reach 13.3 GW in 2025. Across all segments, Wood Mackenzie expects 15 GW of ...

2 &#0183; New plan calls for expansion of energy-storage applications, including more projects in desert areas and at retired coal-fired power plant sites.

There are several key energy technology trends dominating 2025. Security, costs and jobs; decarbonization; China; India; and AI all need to be carefully monitored. The World ...

A new report released by Energy Storage Canada (ESC) illustrates "the substantial potential of [long duration energy storage a.k.a. LDES] to contribute to the realization of the [Ontario]"s ...

The company"s energy storage systems provide safer and flexible power solutions for businesses, industrial, and... The company"s energy storage systems ...

The German Federal Network Agency (Bundesnetzagentur) has awarded 587MW of solar-plus-storage in its latest Innovation Tender.
