What is compressed air energy storage in porous media?

This review focuses on compressed air energy storage (CAES) in porous media, particularly aquifers, evaluating its benefits, challenges, and technological advancements. Porous media-based CAES (PM-CAES) offers advantages, including lower costs and broader geographical availability compared to traditional methods.

Can compressed air energy storage manage intermittency in porous media?

The global transition to renewable energy sources such as wind and solar has created a critical need for effective energy storage solutions to manage their intermittency. This review focuses on compressed air energy storage (CAES) in porous media, particularly aquifers, evaluating its benefits, challenges, and technological advancements.

Why do we need energy storage solutions?

See further details here. The global transition to renewable energy sources such as wind and solar has created a critical need for effective energy storage solutions to manage their intermittency.

What are energy storage materials?

Energy storage materials such as capacitors are made from materials with attractive dielectric properties, mainly the ability to store, charge, and discharge electricity.

What are some good books about energy storage systems?

Prentice Hall, Englewood Cliffs (1979) Giramonti, A.J., Lessard, R.D., Blecher, W.A., Smith, E.B.: Conceptual design of compressed air energy storage electric power systems. *Appl. Energy* 4 (4), 231-249 (1978) Grazzini, G., Milazzo, A.: Thermodynamic analysis of CAES/TES systems for renewable energy plants. *Renew. Energy* 33, 1998-2006 (2008)

What is large-scale energy storage?

Large-scale energy storage is an essential but unsolved component of transitioning global electricity generation from fossil fuels to lower-carbon resources, one that will require innovative approaches that could include new technologies involving Earth's subsurface.

The former prime minister Malcolm Turnbull delivered a keynote speech to open the second day of the Energy Storage Summit Australia 2024.
