What is a battery energy storage system?

Battery energy storage systems (BESS) stabilize the electrical grid, ensuring a steady flow of power to homes and businesses regardless of fluctuations from varied energy sources or other disruptions. However, fires at some BESS installations have caused concern in communities considering BESS as a method to support their grids.

What happened at Gateway energy storage facility?

On May 15, 2024, Gateway Energy Storage Facility in San Diego, California, experienced a BESS fire with continued flare-ups for seven days following the fire. The facility held about 15,000 nickel manganese cobalt lithium-ion batteries.

Why do we need a large-scale power storage system?

Meanwhile, battery safety is improving all the time, with newer systems equipped with improved suppression systems and more fire-resistant battery chemistries. Prof Dryfe says that the increasing reliance on renewables simply makes the building of reliable, large-scale power storage a necessity.
