How many kilowatt-hours can a solar system store?

Systems in these locations are also limited to 40 kilowatt-hours (kWh) of storage capacity. In all other locations noted above, the size limit is 80 kWh. On the exterior walls of the home, it's important to note that systems cannot go within 3 feet of doors or windows leading directly into the home.

How many kWh can you put in a garage?

In all other locations noted above, the size limit is 80 kWh. On the exterior walls of the home, it's important to note that systems cannot go within 3 feet of doors or windows leading directly into the home.
