

## Eta6498 energy storage

Where can I find technical information on the ETA 6497?

The technical details can be found on ETA's website on the pages of the 6497-1, 6497-2, 6498-1, and 6498-2. ETA's training tool has a page for the movement that takes you step by step through the disassembly. Additional information is available on Worn & Wound's page devoted to the movement. The Caliber Corner page compares the 6497 to the 6498.

What is the difference between ETA 6497 & 6498?

ETA's training tool has a page for the movement that takes you step by step through the disassembly. Additional information is available on Worn & Wound's page devoted to the movement. The Caliber Corner page compares the 6497 to the 6498. The 6497 and 6498 were designed as pocket watch movements and are therefore quite large.

What caliber is Eta 6498-1?

The ETA/Unitas caliber 6498-1 is part of ETA's Mecaline Specialties line of movements. It is a hand-wound or manual-wound movement and is considered to be one of the most common mechanical calibers on the market. This is essentially a pocket watch movement that has been adopted by the wristwatch. How many turns of the crown until fully wound?

Chemical energy storage includes hydrogen and other hydrogen-rich chemical energy carriers produced from diverse energy sources. Chemical storage ...

The technical details can be found on ETA's website on the pages of the 6497-1, 6497-2, 6498-1, and 6498-2. ETA's training tool has a page for the movement ...
