

# Fenix 7s sapphire solar battery life

How long does a Fenix 7s solar battery last?

On 2020's Garmin Instinct Solar, I got five days of battery after spending a few of those days in the sun at the height of summer. With the Fenix 7S Solar, I now get at least two weeks of full-featured battery life per charge, with only a few hours in the sun, wearing long sleeves, in a cloudy Portland winter. You get the idea.

Does the Fenix 7 have a solar battery?

Here's the official solar-related battery chart of the Fenix 7 series, and how it compares to each iteration from the Fenix 6 series: As you can see, it's quite significant - again, assuming you have the solar power. But this is only showing that 3 hours. So imagine you're hiking in the summer across a mountain range.

Does Garmin Fenix 7 have solar charging?

One feature I was curious about - and not particularly sold on - was Garmin Fenix 7 solar charging capabilities. It used to be optional on the previous generation of Fenix watches, and I probably wouldn't have splurged for the power glass if I had the option. But with the Pro generation, it comes default so there's no choice.

Is Garmin Fenix 7s a good smartwatch?

Garmin Fenix 7S Pro Sapphire Solar Customers find this smartwatch to be an amazing Garmin device with excellent fitness tracking capabilities, particularly appreciating its sleep and exercise monitoring features.

How much does a Fenix 7 cost?

As you'd expect for a smartwatch that's packed with technology, it's not cheap, with the 'basic' Fenix 7 coming in at \$538 /&#163;599.99 (without solar). Our test model, the Solar, is \$599.99 /&#163;689.99 and comes in two sizes - 42mm and 47mm. If your pockets are cavernous, you could offload \$899.99 /&#163;1,049.99 on the 51mm Fenix 7X Sapphire Solar.

Is Epix pro better than Fenix 7s Pro?

In every scenario, notifications, menus, and widgets were easier to read on the Epix Pro's OLED. As I mentioned, the Fenix 7S Pro has better battery life. That said, the Epix Pro has pretty impressive battery life, too, when you consider that always-on OLED displays tend to be power guzzlers.

If you're using all satellites and multi-band GPS, you can expect around 15 hours of battery life without solar charging and 16 hours of battery life with solar charging.

If battery life is of paramount concern, we look at Garmin's newly upgraded Enduro 2 watch, which has all the features of the Garmin Fenix 7X Solar Sapphire with 24% ...

hi guys, about 1.5 month ago I bought Fenix 7x Sapphire Solar version as an replacement for my old Fenix 3.
