

Garmin 540 solar battery life

Does the Garmin Edge 540 have solar charging?

Solar charging is an option, although it doesn't add a lot of battery life for UK users. The Garmin Edge 540 sits in Garmin's mid-size cycling computer range, and is identical in size to the touchscreen Edge 840. Its dimensions are 85.1 x 57.8 x 19.6mm and it has a 2.6-inch (66mm), 246 x 322 pixel colour screen, again the same as the Edge 840.

Is the Garmin Edge 540 a good computer?

For most activities, the button-based interface works fine, although some functions are fiddly. Solar charging is an option, although it doesn't add a lot of battery life for UK users. The Garmin Edge 540 sits in Garmin's mid-size cycling computer range, and is identical in size to the touchscreen Edge 840.

How long does a Garmin Edge 540 take to charge?

It's significantly quicker to charge up the Edge 540 Solar than the larger, more powerful, Edge 1040, with a full charge taking a couple of hours. Garmin quotes a battery life of 32 hours and even the non-solar version gets a claimed 26 hours per charge.

How long does an Edge 540 battery last?

The claimed battery life of Edge 540 is 26 hours (same as Edge 840), which is a 30% increase. The Solar version can extend the battery life by up to 25 minutes per hour of riding in ideal conditions, which is up to 32 hours in total. For comparison, Edge 1040 has a claimed battery life of up to 35 hours.

Is Garmin Edge 540 better than 1040 solar?

You can skip the 540 Solar as it is half as effective as the 1040 Solar. If you already have a bike computer, consider which features you're missing and whether the 540 offers them. What is the difference between Garmin Edge 530 and Edge 540?

Does Garmin Edge 540 have Bluetooth?

As with the other newer Edge units, the Edge 540 has Bluetooth and ANT+ connectivity to peripherals and a phone, as well as Wi-Fi for uploads, downloads and firmware updates. Garmin has made setting up the Garmin Edge 540 very simple, particularly if you have a previous Garmin computer.
