

Garmin fenix 6 pro solar battery drain

Does the Garmin Fenix 6 have a battery drain problem?

This is STILL a relatively widespread issue that seemed to come to a head at the start of 2021 when I and others posted about it (see re-post below). Well, a year and more has passed since then and Garmin has only just this week decided to release a specific beta firmware to enable logging of battery drain for the Fenix 6, MARQ and Enduro watches.

Does the Garmin Fenix 6 have a good battery life?

The Fenix 6 delivered many tens of hours of life with GPS-enabled and Solar further boosted the 6X Solar to 66 hours of GPS usage. Or so the claims went. At the time it seemed to me and others that 'this was it'. Garmin had significantly nailed the battery conundrum to placate almost everyone who had battery life concerns.

Does the Fenix 6 use a good battery?

Of course, they use good batteries too. The Fenix 6 delivered many tens of hours of life with GPS-enabled and Solar further boosted the 6X Solar to 66 hours of GPS usage. Or so the claims went.

How long does a Garmin Fenix 6 last?

The Garmin Fenix 6 should be good for up to 14 days between charges in smartwatch mode and 48 days in Battery Saver Watch Mode. Of course, if you've been wearing and using the timepiece for the past few years, that will deteriorate somewhat. But battery life should still be close to these ball-park figures.

The Fenix 6 Series brings new features that allow for quickly controlling your watch's battery usage. The Power Manager, featuring Battery Saver and Power Modes, allows you to ...

Garmin has issued firmware update 21.01 for Fenix 6 and Fenix 6 solar which fixes the battery drain issue following update 21.00.
