

# Garmin fenix 7s sapphire solar battery life

Does the Garmin Fenix 7 have a solar battery?

The Fenix 7 Sapphire Solar we tested is equipped with the Garmin's Power Glass, which harvests energy throughout the day to keep the watch's battery topped up. You'll still need to plug the watch in occasionally, but the solar cell extends its battery life significantly.

How long does a Garmin Fenix 7s battery last?

We were also able to try the non-solar Garmin Fenix 7S, and despite having the smallest battery capacity in the range, it retained 56% of its charge after a week of use. That far exceeds Garmin's suggested battery life of 11 days in smartwatch mode alone.

What is the Garmin Fenix 7 Sapphire Solar?

The Garmin Fenix 7 Sapphire Solar is a do-it-all adventure watch with a touchscreen and solar charging for the first time, and improved positioning. It is an upgrade from the Fenix 6.

Does the Fenix 7 Pro have solar charging?

You'll see that the Fenix 7 Pro and Fenix 7X Pro reap more benefits from solar charging. This is because they have larger batteries to begin with. The Fine Print - How Many Lux Hours Do You Need? Before you get too excited, though, it's worth reading the fine print behind these battery life specs.

What size is the Fenix 7x Sapphire solar?

We posted our review of the Garmin Epix (2nd gen) last week, so it's time to follow up with our thoughts on the Fenix 7X Sapphire Solar. There are three available sizes of the Fenix 7 series: 42mm, 47mm and 51mm. There are also three options for editions: standard, solar, and sapphire solar.

I am interested in options, used by Fenix 7 solar owners, for maximizing their devices battery life. Try to benchmark my watch's settings.

Whether you're hiking the Andes or just trying to survive back-to-back Zoom meetings, battery life matters. But how does this rugged little beast actually perform?

If you're using all satellites and multi-band GPS, you can expect around 15 hours of battery life without solar charging and 16 hours of battery life with solar charging.

Battery power, or battery capacity, represents the amount of electrical energy that a battery can store. More battery power can be an indication of longer battery life.

The Garmin Fenix 7S Sapphire Solar Battery can last up to 11 days in smartwatch mode (14 days with Solar),
