

# Garmin solar instinct battery drain

What should I do if my Garmin watch battery drains quickly?

If your Garmin watch battery drains quickly, check for corrupt files or software issues. Uninstall unused Connect IQ content, adjust settings, or update the watch. Perform a reboot or reset the watch to restore settings. Consider battery calibration or deterioration. If issues continue, contact Garmin support for help.

Why does my Garmin battery drain so much?

Garmin typically releases updates to improve device performance and battery life. Turn Off Unnecessary Features: Turning off features that are not in use can significantly extend battery life. Features such as Bluetooth, Wi-Fi, and heart rate monitoring consume power. Disabling these features when not needed prevents battery drain.

Does continuous heart rate monitoring drain the battery?

Studies show that using continuous heart rate monitoring can drain the battery approximately 10% faster than when it is turned off (Garmin, 2021). Monitoring Frequency Settings: Garmin devices allow users to adjust the frequency of heart rate monitoring. Choosing a high monitoring frequency, such as every second, significantly impacts battery life.

Drained the battery completely, also to try to recalibrate the battery and after that charged it 100% and started to track the daily battery usage. Again completely empty within 12 days (even with ...
