Will gem Indonesia present Solartech Indonesia 2026?

With the proven success of Solartech Indonesia 2025, GEM Indonesia will present again Solartech Indonesia 2026 at the greater scale.

Are small Solar power stations a good investment?

Small solar power stations below 30MW are likely to experience very similar cost and revenue drivers as solar power stations above 30MW. So if market conditions within the ISP are conducive to building large solar farm capacity then these will also be favourable conditions for smaller, non-scheduled in-front-of-the meter systems.

Can solar systems claim a large-generation certificate (LGC)?

As an alternative to STCs, solar systems can instead claim Large-Generation Certificates or LGCs which electricity retailers and some other large electricity consumers are obligated to purchase in order to achieve the national Renewable Energy Target.

Can a solar system claim LGCs?

There is no system capacity eligibility requirement for claiming LGCs, however a system that claims STCs is not eligible to also claim LGCs. In the model we assume that only solar systems greater than 100kW will claim LGCs with those 100kW or smaller all opting for STCs.
