Are DC isolators safe?

Our up to 1500V DC isolators, designed based on UL standard for PV system safety, are available in panel and DIN rail-mounted models, handling high-voltage power and enhancing energy storage. With a breathing valve attached on the DC isolator and UV resistant material, our switches have been tested for their safety in solar applications.

Are bulk switches good for solar inverter DC side disconnect?

Designed for solar inverter DC side disconnect, our bulk switches are used by top brands such as SMA, ABB, and SolarEdge due to their consistent quality performance. Combined with other components, our switches can guarantee complete protection from any form of over-voltage and overloading.

How do integrated circuits achieve isolation?

Integrated circuits (ICs) achieve isolation by blocking DC and low-frequency AC currents while allowing power, analog signals or high-speed digital signals to transfer across the isolation barrier.

What voltage is a Beny isolator rated for?

We have BENY isolators ranging from 1000V, 1200V, to 1500V rated for 32A, 50A, 250A, and 400A. Another thing to consider is understanding the IEC and AS certificates. If a DC isolator manufacturer has these certificates, it means the business adheres to the international guidelines in manufacturing solar DC disconnect products.
