

Honda solid state batteries

Honda hopes that its solid-state batteries will be used in future EV models, with a goal of applying the technology to next-generation vehicles by the latter half of the 2020s.

Honda plans to launch electric models with the new all-solid-state battery tech in the "second half of the 2020s." The new demo line replicates the processes required for ...

The automaker built a demonstration production line to figure out how to make affordable, high-density solid-state batteries for EVs and everything else.

Honda plans to launch electric models with the new all-solid-state battery tech in the "second half of the 2020s." The new demo line replicates the processes required for mass production.

Honda's new facility could drive breakthroughs in solid-state batteries for electric cars, ultimately leading to batteries with more than double the range of existing EVs.

Honda's solid-state battery tech offers faster charging, longer range, and better durability, setting the stage for a major EV industry shift.

Honda has unveiled a demonstration production line for all-solid-state EV batteries at its R& D plant in Sakura City, Tochigi Prefecture, Japan. This breakthrough ...

Honda has unveiled a demonstration production line for all-solid-state EV batteries at its R& D plant in Sakura City, Tochigi Prefecture, Japan. This breakthrough represents more than a technological advancement--it's a ...

Honda announced Thursday it has opened a demonstration production line for solid-state battery cells at its R& D center in Japan.

Honda has been taking the initiative in developing our own all-solid-state batteries and establishing technologies necessary for the mass-production of all-solid-state batteries that can ...
