

How to remember the gas tank model

How do I know if my gas tank needs a test?

If your compressed welding gas tank has several date stamps like the one in this picture. Look on down your gas cylinder for the last set of dates you can find. Read the last cylinder date stamp. If you see no star after the date. then you know your cylinder needs a test five years after the last date.

How do I know if my gas cylinder tank is faulty?

Because you'll want to check your gas cylinder tank is within its testing dates. As you won't be stuck with a defective tank. And if you're buying a tank, you want to know if you have to pay to get it tested. Because you won't get your cylinder filled without it showing a valid test date stamp. Look down the side of your gas cylinder.

When was my compressed gas tank last tested?

Now you know when your compressed gas tank was last tested. If there are no other stamps beside the test date then this test is good for 5 years. And the gas tank cylinder in this example would another test after Jan 2019. But you'll see there are some other marks on this cylinder.

What are the markings on a gas cylinder?

The stamps on the shoulder part of cylinders are the main identification criterion. The name of the gas is always stamped on the shoulder part of the gas cylinder. The markings also tell about the inspections, manufacturer, weight, pressure and volume of the cylinder. The markings are in accordance with the standard SFS-EN 13769.

How do I know if my gas cylinder needs a test?

Look on down your gas cylinder for the last set of dates you can find. Read the last cylinder date stamp. If you see no star after the date. then you know your cylinder needs a test five years after the last date. If you see a star then your gas cylinder needs a test 10 years after the date stamp shown.

When did a gas cylinder last Test?

The second yellow square with 14 stands for the year. And for this cylinder it tells you that this gas cylinder's last test happened in 2014. This particular compressed gas cylinder bottle was last tested in January 2014. And if those are the only date stamps on this gas cylinder. Then this is the date the cylinder was first tested and made.
