

How to replace battery in parmak solar fence charger

How do you mount a Parmak solar fence Energizer?

Hang the energizer off of the ground facing due south using the mounting holes on the back of the unit. Parmak solar fence chargers are shipped from the factory with a fully charged battery; however, due to the time from manufacturing date and retail sale, the battery may become discharged.

How long does it take to charge a Parmak Solar Energizer?

The taper chargers are available from your local Parmak dealer. The taper charger will recharge the battery within 48 to 72 hours. The PARMAK Solar energizer's solar panel converts sunlight into electric current to charge the internal battery. The meter on the front of the unit indicates the unit operation and amount of voltage on the fence.

Can I use a different battery for my solar powered fencer?

NOTE: Replace battery only with Parmak Powerhouse rechargeable lead acid (Gel Cell) battery either item #901 (6 volt) or item #902 (12 volt) depending on which model you own. Using any other brand battery will reduce the performance of your solar powered fencer.

How do I reinstall a solar panel battery?

Place the new unit in the the battery case and secure with the two case screws. Reconnect the battery to the solar panel wires. Turn the fence charger switch on and check performance meter on the fence charger for proper operation. If proper operation, turn off fence charger and re-install battery into the case and re-attach the solar panel lid.

How do I re-charge my solar fencer battery?

Battery must be fully charged before using fencer or fencer will not operate properly. To re-charge battery, face your solar fencer due south in northern hemisphere or due north in south-ern hemisphere in direct sunlight (away from any trees or buildings) for a minimum of 5 days with fencer turned off.

How do I use a Parmak battery Energizer?

PARMAK model DF-LI-U.O. & Mag 12 U.O. battery operated energizers are manufactured for outdoor use. Use battery in good condition. Use 6 volt battery with model DF-LI-U.O. Use 12 volt wet cell lead acid battery minimum 80 A.H. rated with model Mag 12 U.O. Connect cable red lead (+) to positive (+) terminal of battery.

Once the battery is installed, replace battery case lid securely by pressing down on the battery case lid. Make sure battery case lid is attached securely to the battery case.
