What is the ESS ETF?

The ESS ETF is an European ETF that follows the performance of firms specializing in battery energy storage systems. The companies included are engaged in such categories as raw materials, manufacture, enabler, and emerging technologies. It is the second European ETF in this sector after BATT.

How are energy ETFs ranked?

Energy and all other sectors are ranked based on their aggregate assets under management (AUM) for all the U.S.-listed ETFs that are classified by ETF Database as being mostly exposed to those respective sectors. If an ETF's sector classification changes, it will affect the aggregate AUM calculations. The calculations exclude inverse ETFs.

Are energy ETFs a good investment?

Energy giants routinely offer dividend yields that far surpass the broader market, making energy ETFs an appealing option for income-focused investors. To narrow the field, we focused only on broad energy sector ETFs - funds that provide diversified exposure across the entire oil and gas value chain.
