

Latest news on building energy storage policy

Energy storage stands as one of the most critical challenges facing modern construction and sustainable development. As the global push ...

In Maryland and New York, the energy storage industry supported new regulations that enforced the latest NFPA 855 requirements. In ...

Buckle up, folks - 2025 is shaping up to be the most transformative year for energy storage policies since sliced bread... or at least since lithium-ion batteries went mainstream.

5 #0183; Policy China targets 180 GW of new energy storage by 2027 in ambitious national plan Announced by the National Development and Reform Commission (NDRC) and the National ...

5 #0183; The proliferation of energy storage in everything from utility-scale batteries to electric vehicles is a driving force in the transition to a cleaner, ...

5 #0183; China plans to more than double its energy storage capacity in the next two years to further accelerate the deployment of renewables.

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the ...

As researchers and engineers investigate new possibilities, let's explore some recent examples of meaningful work to further renewable energy ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two ...

Why is China promoting energy storage at the 2025 two sessions? The buzzword "energy storage" at the 2025 Two Sessions underscores China's strategic focus on building a resilient, ...

WASHINGTON, D.C. -- Today the Solar Energy Industries Association (SEIA) is unveiling a comprehensive policy agenda for President Trump and the 119th Congress to ...

On the contrary, thermal energy storage offers a more feasible alternative. My company focuses on harnessing energy in the form of ice during off-peak hours--when electricity is cheaper and ...

Latest news on building energy storage policy

Storage enables electricity systems to remain in balance despite variations in wind and solar availability, allowing for cost-effective deep decarbonization ...

Two energy storage topics appeared to come up in conversation more than any other at the first day of RE+: US domestic content and the race for energy density increases.

China is looking to almost double its so-called new energy storage capacity to 180 gigawatts (GW) by 2027, according to an industry plan ...

Alameda County has adopted a policy framework and directed its planning department to bring forth zoning code changes that would allow battery energy storage in ...

March 13, 2025 - SAN FRANCISCO - The California Public Utilities Commission (CPUC) today enhanced the safety of battery energy storage facilities by establishing new standards for the ...

4 · MARLBOROUGH, Mass., September 17, 2025--XL Batteries, an energy storage company that is building the lowest-cost, safest and most efficient form of long-duration energy ...

Recent News Cooler Buildings, Stronger Grid: A New Approach to Air Conditioning With Built-In Energy Storage Sept. 4, 2025 NREL Modeling Shows Geothermal ...

In the context of the "dual-carbon" goal and energy transition, the energy storage industry's leapfrog development is the general trend and ...

On March 13, 2025, the California Public Utilities Commission (CPUC) modified General Order (GO) 167 to establish new standards for the maintenance and operation of battery energy ...

The Energy Storage Report is now available to download. In it, you'll find the best of our content from Energy-Storage.news Premium and PV Tech Power, as well as new ...

The mission The Building Technologies Office (BTO) conducts research, development, and demonstration activities to accelerate the adoption of technologies and techniques that enable ...

17 · 17.09.2025 Over 63,000 attacks on energy infrastructure have occurred since the full-scale invasion, with more than 700 of them purposefully targeting critical facilities. As of the ...

China aims to nearly double battery storage by 2027 in \$35 billion plan China is looking to almost double its so-called new energy storage ...

-- The Solar Energy Industries Association (SEIA) is unveiling a vision for the future of energy storage in the

United States, setting an ambitious target to deploy 10 million ...

How much did energy storage corporate funding hit in 2024? Energy storage corporate funding hits \$17.6 billion in nine months of 2024 Corporate funding in the energy storage sector saw a ...

Energy storage can help manage bills and keep electric rates low In many cases, storage can be used instead of traditional, costly, and slow investments in grid infrastructure. Utilities can use ...

Grid-scale storage deployments alone are expected to reach 13.3 GW in 2025. Across all segments, Wood Mackenzie expects 15 GW of ...

This information was prepared as an account of work sponsored by an agency of the U.S. Government. Neither the U.S. Government nor any agency thereof, nor any of their employees, ...

WASHINGTON D.C. -- The Solar Energy Industries Association (SEIA) is unveiling a vision for the future of energy storage in the United States, setting an ambitious ...

2 · New plan calls for expansion of energy-storage applications, including more projects in desert areas and at retired coal-fired power plant sites.
