Who are the top investors in the energy storage industry?

The top investors in the energy storage industry have collectively contributed more than USD 34.1 billion to the sector. Here's a breakdown of the leading contributors: Rabobank has supported 268 companies with USD 5 billion, supporting the expansion of large-scale energy storage like 420 MWh. KKR has deployed USD 4.4 billion into 11 companies.

Where are energy storage innovation clusters located?

At the city level, innovation clusters around Shenzhen, London, Melbourne, Sydney, and New York City reflect both established powerhouses and rising players in the energy storage race. The energy storage industry recorded an annual growth rate of 5.69% with sustained market momentum of innovation, global demand, and clean energy policies.

What is the growth rate of the energy storage industry?

The energy storage industry recorded an annual growth rate of 5.69% with sustained market momentum of innovation, global demand, and clean energy policies. The market is valued at USD 288.97 billion in 2025 and is projected to reach USD 569.39 billion by 2034 with a 7.87% compound annual growth rate (CAGR) for 2025-2034.

Why is Panasonic a leading energy storage company?

Thanks to a wide and varied portfolio of solutions, Panasonic has positioned itself as one of the leaders in the energy storage vicinity. Panasonic is one of the industry's top names due to its advances in innovative battery technology alongside strategic partnerships and extensive experience in manufacturing high-quality products.

What are the top 5 energy storage hubs?

Geographically, the top five country hubs are the USA, the UK, China, Germany, and Australia. At the city level, innovation clusters around Shenzhen, London, Melbourne, Sydney, and New York City reflect both established powerhouses and rising players in the energy storage race.

Is energy storage a good investment?

The energy storage sector scales technologically and attracts decent investment activity. It undergoes an average investment value of USD 92.1 million per round. Over 10 280 funding rounds are closed to date, which indicates a consistently active funding pipeline.

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

Currently, the domestic energy storage industry in China is rapidly moving towards commercialization, with several local governments ...
