

Liveu solo battery

How do I charge the LiveU solo?

The LiveU Solo contains an internal battery that enables up to two hours of standalone operation when fully charged. We recommend charging the battery for at least 4 hours before first using the LiveU Solo. To charge the battery, plug the 12V AC Power Adapter into the DC IN connector on the LiveU Solo.

What is the difference between LiveU solo & LiveU pro?

The Solo plan is designed for individual content creators, while the Pro and Enterprise plans are geared toward larger organizations. There are plenty of other video encoders on the market that are like the LiveU Solo PRO SDI/HDMI 4K Video/Audio Encoder.

How much does LiveU solo cost?

Starting as low as 995 USD. LiveU Solo uses the same bonding technology utilized by major broadcasters - LiveU Reliable Transport (LRT(TM)). This allows you to combine multiple IP connections (cellular, WiFi and Ethernet), ensuring bandwidth consistency across the most challenging cellular networks.

How does LiveU solo work?

comes with an easy-to-use interface. LiveU Solo connects automatically to Wowza Streaming Cloud, as well as other popular CDNs, OVPs and YouTube Live. Solo can be managed and controlled remotely via a web interface or smartphone. What's in the Box? Need help? Do you have a question about the Solo LU-200 and is the answer not in the manual?

Is LiveU solo a good alternative to satellite?

Other than that, it's a reasonable alternative to satellite. If you're worried about data usage, the LiveU Solo PRO lets you set limits on your data usage, so you can avoid overage charges. In addition to the physical LiveU Solo PRO Encoder, you also get access to the LiveU Solo App.
