What is a Master's in energy storage?

Master's Programme in Energy Storage is jointly organized by the School of Engineering and the School of Chemical Engineering. The programme is coordinated by the School of Engineering. Energy storage touches every discipline present at every step of the renewable energy value chain; it is the key to energy sustainability worldwide.

What is an energy master's degree?

Each of the four energy master's degrees are based in engineering, aligned with new discoveries in science, attuned to sustainability and the environment, and informed by a broader perspective in economics and public policy.

What is a foundational energy master's degree?

The two Foundational Energy Master's Degrees (M.S.) are: The Energy Science, Technology and Policy (EST&P) degree is the base degree program, on which all the other EST&P degrees are built. It requires two semesters of full-time study for completion of 96 units of qualifying coursework.

Is energy storage part of EIT InnoEnergy Master School?

Energy Storage is part of EIT InnoEnergy Master school. It is a two-year Master's programme including compulsory mobility for the students. More information can be found on the program's website [Read about the experience of our student Albert Rehnberg and follow his path!](#)

What is an applied study energy master's degree?

An Applied Study Energy Master's Degree (M.S.) at Carnegie Mellon University integrates professional development (3 units) and a summer internship (3 units) with the base degree. The two options are the EST&P - Applied Study (EST&P-APS) degree and the other Applied Study Energy Master's Degree.
