

Panerai has less energy storage

What is Panerai lab-ID?

Panerai has taken this concept and applied it to a mechanical timepiece, the Submersible Elux LAB-ID, which is capable of on-demand lighting powered by fully mechanical energy storage with no active electronics - an impressive feat. The name Elux actually refers to another defunct and obscure Panerai technology.

What is a Panerai L-R inclinometer?

L-R: a Panerai Elux torch pictured alongside the Submersible Elux LAB-ID, and a Panerai Elux inclinometer, intended to be used in tanks. This Panerai isn't the first watch with a mechanical light or luminescence.

How much does a Panerai submersible elux lab-ID cost?

The Panerai Submersible Elux LAB-ID is a limited edition of 150 pieces, with an availability of 50 pieces per year over three years. Price: US\$97,400. This beefy watch uses a complex six-barrel system that's wound by a typical automatic rotor to mechanically power LED backlights.

What is Panerai elux?

Panerai's Elux offerings were originally electroluminescent panels powered by either small chemical batteries or fixed AC supply, intended for use in naval and military applications. Panerai Elux products also included lamps, signals, inclinometers and instrument panels. It's cool to see the Elux name return on a watch.
