

# Qatar water storage project

Does Qatar have a water mega reservoir?

In 2010, Qatar only had around 48 hours' worth of water stored in case of emergencies. This led to the state-owned water utility company Kahramaa to invest in drinking water storage capacity. To increase the storage capacity, it began the Water Mega Reservoirs project.

How will Qatar's new water supply system work?

The reservoirs and pipeline network, with associated pumping stations, will provide up to 17 million cubic meters of strategic potable water storage and will serve the population of Qatar for generations to come.

Why is water security important in Qatar?

As a strategic project, it enhances Qatar's water security and provides a high-quality service in accordance with the highest international and local standards. Also, it promotes the country's sustainable advancement ensuring harmony between economic, social and environmental development.

How many mega reservoirs are being built in Doha?

At five different sites around greater Doha area, new mega reservoirs are being built along with integrated pumping stations including more than 650 km of interconnecting water pipelines. The reservoirs and pipeline network, with associated pumping stations, will provide up to 17 million cubic meters of strategic potable water storage.

How did Qatar improve its water supply?

To address its water supply issues, Qatar constructed and expanded its first desalination plants, which supply 99% of the country's water needs. The plants changed how people moved in the region. They went from being transient populations to permanent populations settled mainly in the city of Doha, the current capital of Qatar.

How can aquifers store water in Qatar?

Qatar envisions employing regional aquifers to store water via forced injection of desalinated water and thus increase available from a few days to two months. A strategy for the implementation of forced injections is proposed based on a spatially distributed model of groundwater flow at the scale of the whole country.
