

# Ring solar battery not charging

Why isn't my Ring solar panel charging?

If the voltage in the Ring system is depleted, the app will indicate, "not connected". Additionally, if the solar panel is shaded, the electrolyte process will stop since the solar panel hasn't been exposed to the sun long enough to generate electricity.

Why is my solar charger not charging?

The Solar Charger and Solar Panel provide a trickle charge to the battery in compatible devices to increase time between charges. If your solar accessory is not charging the device as expected or shows "Not Connected" in the Ring app, check the following: Make sure the connection is secure: Unplug the Solar Charger from the device.

Can a solar panel charge a battery directly?

A solar panel cannot charge a battery directly. The system will not work if the solar panel, battery charger, and battery aren't correctly installed. One common installation error is connecting the panels directly to the batteries. Using a solar controller is strongly recommended.

What should I do if my ring solar panel won't work?

Check all of the connections between the panel and the doorbell. If the micro cable that connects the doorbell to the panel incurred damage, replace it with an original equipment manufacturer (OEM) part. The Ring solar panel will not work with other USB cables.

Why is my ring solar panel not working?

No obstruction should block sunlight from the solar panel's front. This may require moving the doorbell camera to another area of the home, for example, the banister of the front steps. So your Ring Solar Panel receives plenty of sunlight, and it has previously charged fully. But now, for some reason, it has stopped working.

Is a Ring Solar Panel safe?

Ring Solar Panels are safe, but they will only start charging a Smartphone when the battery level falls below 90% to prevent overcharging, which can be dangerous for lithium-ion batteries and reduce their lifespan.

It's possible the problem could be with the Ring Solar Panel itself. Make sure it's clear of any dirt or debris, and that it's firmly connected to the Stick Up Cam.

Insufficient sunlight, compatibility problems, defective parts, or faulty installation often cause a Ring solar panel not charging. With the right information and a systematic ...
